

Partner with Resiliency Gardens to Cultivate Resilient Youth and Healthier Communities!

Join us in an impactful mission to empower young minds and support environmental and food education.

Why This Partnership Matters:

1. **Healthier, Inclusive Communities:** Our school and community gardens are more than learning spaces; they are safe, welcoming environments where children and adults of all ages, find a sense of belonging and community.
2. **Environmental Stewardship:** By learning to grow their own food, learners develop a lifelong appreciation for sustainable practices, resonating with your company's commitment to a greener, healthier world.
3. **Support for Local Agriculture:** With a focus on cultivating local food sources, this program fosters appreciation for regional produce — reinforcing the values of companies like yours.

How Your Support Makes a Difference:

Your sponsorship can directly provide:

- **Gardening Infrastructure and Supplies:** Equipping each school or community garden with construction materials, soil, seeds and gardening tools to ensure an engaging, hands-on experience for all learners.
- **Specialized Training for Student Interns and Educators:** Enabling teachers, supported by university interns, to integrate garden-based learning into school curriculums and cater to diverse student needs.
- **Community Events:** Hosting events where your brand can engage with students and families, teaching about sustainable food practices while promoting community cohesion.

Benefits of Corporate Sponsorship:

- **Brand Visibility:** Showcased on garden signage, educational materials, and community event platforms.
- **Community and Social Impact:** A tangible way to show your commitment to health, education, and environmental sustainability.

- **Employee Engagement Opportunities:** Inviting your team members to volunteer in these gardens, strengthening both community ties and employee fulfillment.

Join Us in Growing a Healthier, More Sustainable Future!

Together, we can continue to cultivate skills and habits that empower today's youth — our future advocates for sustainable living and resilient communities.

Let's discuss how we can make this partnership a reality by emailing June Lavelle at june.lavelle+RG@gmail.com
